of experience

ABOUT HITECH WLL

Hitech W.L.L. is an ISO 9001:2008 Certified Information Technology service and solutions provider with more than 27 years of experience in serving local and regional markets since its establishment in 1991 in the Kingdom of Bahrain. By providing quality products and services at an outstanding value, Hitech has established itself as a primary IT service and solutions provider in all sectors of Bahrain market. We work with a variety of large corporations and governmental bodies and at the same time, we target SMEs with the needs for cost-effective solutions that allow established and emerging businesses to compete with larger corporations.

Hitech Services

Increasingly, Professional Service organizations around the world are relying on Hitech Software to meet the needs of their project-centric businesses. Whether it's called Professional Service Automation, Enterprise Service Automation, ERP for Services or at a more mundane level, Project Accounting, Hitech for Service Enterprises has been explicitly developed from the ground up to address the specific requirements of professional services organizations in managing the delivery of client projects, and the resources required for those projects.

Software Development & Migration

In an ever-changing world, staying ahead of the competition is now harder than ever before. Optimisation of business processes and performance is a continuous necessity if we are to improve customer engagement, realise increased efficiency and ultimately generate increased turnover and profit. To achieve this, organisations must implement software solutions that are specifically designed and developed to their unique business processes. We offer leading-edge technical knowledge and proven experience, taking a consultative approach to understanding your needs in order to support you in choosing the most suitable development approach.

Customers have multiple and changing requirements for the operational availability of their IT equipment. Our IT Support & Maintenance Service offers multiple and variable options to meet these challenges, which can be provided independently or as part of a total Managed Service. Our engineers are manufacturer accredited and we aim for a single visit fix to minimise business disruption. We have a flexible approach and our pricing model allows charges to be inventory, activity, resource or frequency-based.

IT Maintenance & Support

IT Outsourcing

Demanding, high-volume day-to-day activities can severely impact an IT departments ability to contribute to the strategic progress of the organisation. We help organisations understand what is important to the organisation and should be kept close, to assist in identifying commodity services that could be obtained more cheaply by Selected Insourcing. Our customers are able to think strategically about the issues that really matter to their business, and innovate accordingly.

The Prime focus of any business consulting firm is to bring together business and IT in order to help their clients realize the importance of investing in IT enabled services to increase the value of their business. Today every organization understands the importance of investing in the emerging technologies to be ahead of their competitors in the never ending business race and at the same time delivering promising and satisfactory services to the shareholders. But the difference in the organizations goals and perspectives stands as barriers in the company's growth. Budget and time are yet other factors that have left the IT companies little to no chance to innovate. Our team has used its experience and expertise, in bridging this gap between cost and quality.
